Gudur

PROJECT EXPERIENCE

Supermarket sales analysis & exploratory data visulization

feb 2024 - May 2024

- **data Analysis and data visulization**

Users can explore customer behavior, product performance, and sales trends through an informative dashboard. This project showcases my proficiency in Python and data visualization, with the potential for future enhancements like additional visualizations and interactive filters.

Diabeites predication at value laden

May 2023 - July 2023

- **data science using machine learning algorithms**

A model to predict insurance costs based on people's data, including age, Body Mass Index, smoking or not. A model to find five main predictors of type 2 diabetes: glucose, pregnancy, body mass index (BMI).

Rejolt Technologie pvt.lmd

Sep 2023- Oct 2022

- **portfolio website design**

Designed and developed a personal portfolio website to effectively showcase my skills, experience, and accomplishments to a target audience. The website includes informative content about my background, a dedicated project section with visuals, and clear contact information
